

AMARORWOT NAOMI

Full-Stack Developer · Backend & Frontend · AI Integration

+256 709 124 144 | amaronaomi134@gmail.com | github.com/Amaro134 | Kampala, Uganda

PROFESSIONAL SUMMARY

Full-stack developer with hands-on production experience across backend, frontend, mobile, DevOps, and AI integration. Core stack: React/TypeScript, Node.js (NestJS), Python (Django), PostgreSQL, Prisma ORM, Supabase, React Native (Expo), and Docker/GitHub Actions CI/CD. Shipped features end-to-end on a live corporate wellness platform, from a Claude Vision OCR data pipeline to a coach-facing dashboard, and independently designed, built, deployed, and security-audited a full medical appointment booking system. Microsoft Azure Fundamentals, Hedera Certified Foundation (HCF), and Google Ads Display certified. Comfortable owning a feature from schema design through production deployment, and equally comfortable auditing someone else's code for security gaps.

EXPERIENCE

Full Stack Developer (Apprentice) — Refactory Academy — Beyond Sports Oct 2025 – Jun 2026

Node.js (NestJS) · React/TypeScript · React Native (Expo) · PostgreSQL · Prisma ORM · Docker · GitHub Actions · Firebase · REST APIs · Agile/Scrum

- **Backend & API development:** Built and maintained RESTful NestJS APIs covering authentication, push notifications, rate limiting, and caching for a live corporate wellness platform used by real companies and coaches.
- **AI feature ownership:** Took a Claude Vision OCR data-extraction pipeline from design to production as sole owner, integrating Supabase Storage, SHA-256 deduplication, and fraud detection, with Prisma schema migrations to support it.
- **Database design:** Designed PostgreSQL schemas and managed iterative migrations across user, activity, challenge, and leaderboard modules using Prisma ORM.
- **Frontend:** Built and iteratively refined a React/TypeScript coach dashboard, including challenge management, company participants, leaderboard, notifications, and settings modules.
- **Auth & integrations:** Implemented Google Sign-In via Firebase ID token verification and migrated push notifications from Firebase FCM to expo-notifications for the mobile app.
- **DevOps:** Converted GitHub Actions pipelines from auto-deploy to manual workflow_dispatch, and set up Docker/GHCR image builds with SSH-based deployment; resolved ~107 ESLint errors across the codebase.
- **Delivery & collaboration:** Delivered consistently across 6 Agile sprints and collaborated daily with React.js, React Native, and backend teammates via Git/GitHub across three repos.
- **Communication:** Prepared and delivered a 20-minute stakeholder pitch for the platform using the RMPA framework, presenting as the team's QA, design, and frontend contributor.

QA Engineer & Full-Stack Developer — Kampala EEG Labs — Medical Appointment Booking System

2026

React/Vite · NestJS · Prisma · PostgreSQL · Supabase · DigitalOcean · GitHub Actions

- Built and deployed a full-stack medical appointment booking system end-to-end, covering the React/Vite frontend, NestJS/Prisma backend, and infrastructure on DigitalOcean with GitHub Actions CI/CD and Supabase.
- Conducted a layered security audit of the platform and implemented fixes across input validation, file upload handling, rate limiting, and CORS configuration.

PORTFOLIO PROJECTS

MindEase — Mental Wellness Platform

2025

Python · Django · PostgreSQL · Render · CI/CD · REST API · React Native

- Designed and built a full-stack web and mobile wellness application end-to-end — Django REST backend, PostgreSQL database, authentication, and a CI/CD pipeline on Render — shipping a working MVP within 8 weeks.
- Positioned as a free, accessible wellness platform for the East African market; currently expanding the mobile experience with React Native and Expo.

My Grocery Buddy — Full-Stack Web App

2025

Python · Django · PostgreSQL · MySQL · REST API · Git

- Built a grocery management application from scratch with a Django REST API, authentication, full CRUD operations, and PDF/CSV export functionality.

TECHNICAL SKILLS

Frontend: React.js, React Native (Expo), TypeScript, JavaScript ES6+, HTML5, CSS3

Backend: Node.js, NestJS, Python, Django, REST API Development

Databases: PostgreSQL, MySQL, SQLite, MongoDB (familiar), Supabase, Prisma ORM

Cloud & DevOps: Docker, GitHub Actions (CI/CD), DigitalOcean, Render, Vercel, Git & GitHub

AI & Automation: Claude Vision OCR integration, Supabase Storage, data deduplication & fraud detection logic

Blockchain: Hedera Hashgraph fundamentals (HCF certified)

Methodologies: Agile/Scrum, iterative SDLC, cross-functional collaboration

Languages: English (fluent), Luo, Luganda

SOFT SKILLS

Effective Communication · Personal Effectiveness · Emotional Intelligence · Employability Skills · Creativity & Problem-Solving

EDUCATION & CERTIFICATIONS

- Full Stack Developer Apprenticeship — Refactory Academy · Oct 2025 – Jun 2026
- Certificate in Software Engineering (Python) — Refactory Academy · Jun – Sept 2025
- Full Stack Developer Program — Tunga Academy
- Hedera Certified Foundation (HCF) — The Hashgraph Association · Issued Jul 2026
- Microsoft Azure Fundamentals Certification — Microsoft
- Google Ads Display Certification — Google Skillshop · Issued Jun 2026,
- Data Analysis Certificate — Digitalety Drive
- Professional Soft Skills — BrighterMonday Uganda
- Uganda Certificate of Education (UCE) — Kirinya Church of Uganda Secondary School
